## MIDLEVEL CIVIL ENGINEER

MSK Engineers has an opening for a midlevel civil engineer to join our team of creative, collaborative, and community-oriented professionals.

For almost 30 years, MSK has been working to develop, improve, and sustain the critical physical resources that communities depend on for growth and vitality. We work with clients in the public, nonprofit, and private sectors to develop strong, vibrant cities and towns, and we specialize in helping our clients overcome the financial and logistical challenges that accompany revitalization and redevelopment. Our vision: communities that work for people.

We are seeking an individual with demonstrated experience in civil engineering to manage civil design and permitting projects for a variety of residential, commercial, institutional, and municipal clients. The successful candidate must have a strong work ethic and professional demeanor, thrive in a collaborative work environment, and be willing to perform both office and field work.

### Qualifications

- Bachelor's degree in civil engineering from an accredited college (required)
- Registered professional engineer
- At least 5-7 years of professional design and construction administration experience

### Responsibilities

- Manage civil design and construction administration services for site development and transportation projects
- Perform standard civil engineering design calculations and quantity estimates
- Develop reports and preliminary concept designs
- Prepare detailed design documents for submittal to clients, municipalities, agencies, and others as directed
- Administer construction phase services, including field observation, preparation of pay applications and change orders, and construction coordination
- Resolve design and construction issues

### Skills & Knowledge

- Familiarity with project management best practices
- Basic knowledge of land survey and civil engineering terms and practices
- Familiarity with construction standards and terminology
- Ability to work independently on complex projects with general direction
- Ability to handle multiple projects simultaneously
- Strong organizational, analytical, and problem-solving skills
- Excellent verbal and written communication skills
- Ability to work in a team environment
- Familiarity with AutoCAD Civil 3D and Microsoft Office Suite is required; familiarity with hydraulic/hydrologic stormwater modeling software (HydroCAD or similar) is preferred.

### Benefits

As a people-first engineering firm, MSK is committed to the growth and well-being of our employees. We offer a full benefits package, including health insurance, matching retirement contributions, life insurance, and paid leave, as well as a competitive salary commensurate with experience and qualifications. There may be opportunities for long-term partial remote work for the right candidate.

**To apply:** Please send a cover letter and resume to [smulligan@mskeng.com](mailto:smulligan@mskeng.com).
