SENIOR CIVIL ENGINEER

MSK Engineers has an opening for a senior civil engineer to join our team of creative, collaborative, and community-oriented professionals.

For almost 30 years, MSK has been working to develop, improve, and sustain the critical physical resources that communities depend on for growth and vitality. We work with clients in the public, nonprofit, and private sectors to develop strong, vibrant cities and towns, and we specialize in helping our clients overcome the financial and logistical challenges that accompany revitalization and redevelopment. Our vision: communities that work for people.

We are seeking an individual with demonstrated experience in civil engineering to manage civil design and permitting projects for a variety of residential, commercial, institutional, and municipal clients. The successful candidate must have a strong work ethic and professional demeanor, thrive in a collaborative work environment, and be willing to perform both office and field work.

Qualifications

- Bachelor's degree in civil engineering from an accredited college
- Registered professional engineer
- At least ten years of professional design and construction administration experience

Responsibilities

- Plan, coordinate, and manage civil design and construction administration services for site development and transportation corridor development projects
- Foster relationships with existing clients and develop new client relationships to sustain and grow the firm's civil engineering practice
- Develop and review engineering feasibility studies, design plans, contract documents, opinions of probable cost, and bid documents for civil design projects
- Provide mentorship and guidance to project and staff engineers and designers
- Perform occasional field work and travel as necessary support projects and client relationships

Skills & Knowledge

- Proven experience with design and construction administration of site civil development projects
- Demonstrated ability to manage multiple projects simultaneously
- Strong organizational, analytical, and problem-solving skills
- Excellent verbal and written communication skills
- Familiarity with AutoCAD Civil 3D and Microsoft Office Suite is required; familiarity with hydraulic/hydrologic stormwater modeling software (HydroCAD or similar) is preferred.
- Experience working with municipalities, state transportation agencies, and regional planners on planning, design, and construction of transportation projects is preferred.

Benefits

As a people-first engineering firm, MSK is committed to the growth and well-being of our employees. We offer a full benefits package, including health insurance, matching retirement contributions, life insurance, and paid leave, as well as a competitive salary commensurate with experience and qualifications. There may be opportunities for long-term partial remote work for the right candidate.

To apply: Please send a cover letter and resume to smulligan@mskeng.com.
