

## SENIOR GEOTECHNICAL ENGINEER

MSK Engineers has an opening for a Senior Geotechnical Engineer to join our team of creative, collaborative, and community-oriented professionals.

For almost 30 years, MSK has been working to develop, improve, and sustain the critical physical resources that communities depend on for growth and vitality. We work with clients in the public, nonprofit, and private sectors to develop strong, vibrant cities and towns, and we specialize in helping our clients overcome the financial and logistical challenges that accompany revitalization and redevelopment. Our vision: communities that work for people.

We are seeking a Senior Engineer who will be responsible for project management and technical leadership of geotechnical engineering projects and tasks including design and remediation of dams, levees and hydropower facilities; geotechnical instrumentation; geotechnical investigations and design for major water infrastructure including conveyance (penstocks, pump stations, pipelines, canals and tunnels), bridge, and waterfront facilities.

### Responsibilities

- Preparing technical scopes of work for proposals and projects, project budgets, requests for proposals for contractors, and technical reports.
- Leading proposal teams and presentations.
- Leading and participating on multi-disciplinary, multi-geographic project teams.
- Maintaining high visibility in the marketplace through regular client contact, participation in client-based professional organizations, and attendance and presentations at industry events.
- Managing projects and staff, including technical leadership and oversight, risk management, and mentoring.
- Assisting in recruiting and training additional staff.
- This position has a field component; travel and some overnight travel are required.

### Skills & Knowledge

- Minimum of B.S. degree in Civil or Geotechnical Engineering or related field. (M.S. preferred.)
- 10 years of previous professional experience in geotechnical engineering; significant Project Management experience, including proposal preparation and budgeting; thorough knowledge of state and federal regulations; proven business development skills.
- Extensive geotechnical background including a strong fundamental knowledge of principles of geotechnical or geostructural engineering, soil and rock mechanics, earthquake engineering, and groundwater hydrology.
- Recognized for technical excellence and development of client-focused, creative, and practical solutions.
- Willingness and ability to travel on short-term assignments as needed.
- Willingness and ability to perform field tasks and oversight.
- Valid U.S. driver's license.
- Professional Engineering license required.

### Benefits

As a people-first engineering firm, MSK is committed to the growth and well-being of our employees. We offer a full benefits package, including health insurance, matching retirement contributions, life insurance, and paid leave, as well as a competitive salary commensurate with experience and qualifications. There may be opportunities for long-term partial remote work for the right candidate.

**To Apply:** Please send a cover letter and resume to [sparadiso@mskeng.com](mailto:sparadiso@mskeng.com)

*MSK Engineers is deeply committed to fostering a transparently inclusive workplace environment and people of color, women, people with disabilities, veterans, and LGBTQ candidates are very strongly encouraged to apply. Our mission has always been to support very diverse communities and we are deeply committed to having teams and leaders that reflect this mission.*
