

Environmental Engineer

Position overview:

MSK Engineers, a multidisciplinary engineering consulting firm, is seeking an individual with entry level experience in environmental engineering to join our growing team of creative, collaborative, and community-oriented professionals in downtown Bennington, Vermont, and other Vermont satellite office locations. Responsibilities will include a range of drinking water infrastructure and environmental site assessment and remediation projects for a variety of commercial, institutional, state, and municipal clients. The successful candidate must have a strong work ethic and professional demeanor, thrive on hybrid collaboration, and be willing to perform both in an office environment and in the field.

About us:

Headquartered in the historic train station in Bennington, VT, we also support a hybrid work environment for staff with various offices in Vermont, currently serving clients in VT, NY, CT, and CO. Our services span environmental, civil site, geotechnical, regulatory assistance, transportation, survey, and construction administration. We've been working in the public, nonprofit, and private sectors for over 30 years to support our mission of helping communities thrive by keeping people safe, healthy, and connected.

Our staff bring decades of experience, and our junior staff are regularly mentored and trained across each division, allowing us to provide consistent, high-quality, and innovative solutions. We offer a creative and flexible workplace while also maintaining a supportive, respectful, and professional environment for staff to reach their greatest potential.

You'll be provided with the chance to:

- Perform standard civil design calculations (including but not limited to quantity and cost estimation)
- Draft plans, specifications, and detailed drawings under the supervision of a senior project team member
- Prepare construction documents for submittal to clients, municipalities, agencies, and others as directed
- Perform construction phase engineering services, including field observation, resolution of contractor inquiries, design advice, review of payment applications and change orders, and construction coordination
- Work independently and in a team environment on various projects and tasks, including stormwater, wastewater, transportation, grading plans, utility connection design, and site development
- Develop reports and preliminary concepts and assessments

Here's what you'll need:

- Bachelor's degree in environmental engineering from an ABET accredited college (required)
- E.I.T. certification
- Ability to work independently or in a team environment and collaborate virtually
- Willingness to perform both in an office environment and in the field
- Strong organizational, analytical, and problem-solving skills
- Ability to work independently on multiple projects with general direction
- Excellent verbal and written communication skills
- Proficient with AutoCAD, Microsoft Office Suite, BlueBeam or other pdf editing software is required. Experience with electronic database programs is a plus

Benefits:

As a people-first engineering firm, MSK is committed to the growth and well-being of our employees. We offer a full benefits package, including health insurance, matching retirement contributions, life insurance, and paid leave, as well as a competitive salary commensurate with experience and qualifications.

To Apply:

If you are interested in joining our team, please submit your current resume to Stephanie Mulligan at smulligan@mskeng.com with the subject line "Environmental Engineer application".

We look forward to hearing from you!
