

MSK ENGINEERS

People-First Engineering

We are a privately-owned Vermont-based multidisciplinary civil engineering consulting firm that has been developing and improving the critical physical resources that communities depend on for over 30 years. We serve the public, nonprofit, and private sectors, and we specialize in supporting our clients throughout all stages of the development process that accompany revitalization and redevelopment.

Our Philosophy

Our mission has always been to advance infrastructure that helps communities thrive by keeping people **safe, healthy, and connected**. Our highly motivated staff share this vision and possess both the technical skills and decades of experience to help create communities that work for people and offer an outstanding quality of life to all who call them home.

Our Services

As multidisciplinary professionals, we provide support throughout the entire project lifecycle. This includes leading scoping studies, developing project budget and conceptual designs, development and construction oversight, survey and deed research, management of state and federal funding, and providing support to help navigate complicated permitting processes in order to maintain compliance. Our areas of service include:

- Civil/Site Design
- Construction Administration
- Environmental Remediation
- Geotechnical Engineering
- Lead & Copper Rule Compliance
- Permitting & Planning
- Project Financial Planning
- Stormwater Systems
- Survey & Mapping
- Transportation
- Wastewater Infrastructure
- Water Systems

We strive on every project to create opportunities that enhance community health and promote economic revitalization. Whether it be downtown redevelopment, recreation trail improvements, affordable housing site design, or water system upgrades to provide clean drinking water to all citizens, we design infrastructure that makes life better.

We are currently licensed in CO, CT, MA, NH, NY, and VT.

LEAD SERVICE LINE INVENTORY

Since 2017 MSK has been Vermont’s leaders in identification and replacement of lead service lines. We are the first in the nation to implement a stepwise approach to service line identification that leverages multiple techniques to accurately identify materials in a cost-effective manner; our customer outreach program has a 93% response rate, and our stepwise approach has been 98% effective at identifying lead in service lines. We also assist in procuring project funding and management of all financial, administrative, and technical aspects from the initial scoping study phase through construction completion.

We are currently conducting identification and inventory projects for 100+ public water systems throughout VT, and are in the initial stages of replacing found lead lines in the town of Bennington.

PARTNERSHIP

Our portfolio of projects and the clients we serve reflect our commitment to safeguarding public trust and enhancing the vibrancy of our towns and surrounding regions. Recent project highlights include:

Southwestern Vermont Medical Center:
Emergency services modernization

Town of Silverton, Colorado:
Environmental characterization, soils remediation

State of Vermont:
Lead service line inventory, identification, replacement

Town of North Bennington:
Road rehabilitation

Shires Housing:
Wastewater, stormwater design

Casella Waste Management:
Environmental & site design

Town of Bennington:
Waterline extensions for PFAS remediation

Head Start Childcare Center:
Stormwater redesign, roadway improvements

Town of Whitingham: Flood mitigation

Town of Dorset: Mixed use path design

Prospect Mountain: Trail expansion

OUR TEAM

We cultivate a creative, flexible, and rewarding place to work by investing in our people. Our staff in multiple locations bring decades of experience from a variety of disciplines, allowing us to provide high-quality and innovative service to our clients. We laugh a lot!

Improving the critical resources that communities depend on for growth and vitality is what motivates us.

WHERE TO FIND US
